CHAPTER 1

BATTERY-POWERED TOOLS

CORDLESS POWER TOOLS FOR EVERY REQUIREMENT

Maintaining wooded and green areas poses a range of challenges. We offer four cordless ranges, so you're sure to find the right tool for the job with STIHL. Powerful, comfortable to use and with plenty of battery options with long battery lives, cordless tools can help you overcome the greatest challenges. So, whether in your own garden or professional use, you can always rely on top performance with cordless power from STIHL.

CORDLESS TOOLS FOR SMALLER GARDENS

AI LINE

STIHL AI Line cordless products give you the support you need for keeping your garden looking its best. With built in batteries, they offer light weight and straightforward handling, making jobs for the domestic user even easier to complete.

CORDLESS TOOLS FOR GARDEN CHALLENGES

AS SYSTEM

The compact, easy-to-handle power tools in the AS System are perfect for occasional work outside the house and in garden maintenance. The power you need is reliably delivered by a replaceable AS 2 battery.

CORDLESS TOOLS FOR MEDIUM-SIZED AND LARGER GARDENS

AK SYSTEM

You will be impressed by the power and stamina of the AK System. Equipped with this flexible range of power tools, you can meet any challenge in your garden. Most power tools in the AK System can be used with any of the AK batteries, and charged with the AL 101 or AL 300 charger.

CORDLESS TOOLS FOR LARGE GARDENS AND PROFESSIONAL APPLICATIONS

AP SYSTEM

Powerful performance, long battery life and outstanding handling are essential when tackling more demanding gardening jobs. STIHL's AP System offers quiet, emission free performance, particularly useful in noise-sensitive areas. This extensive system with a wide selection of products with exchangeable batteries and backpack batteries are suited to large gardens and for professional use.

① Max area coverage with both batteries in set in optimum conditions. Examples use recommended battery. In addition to the type of battery used, other factors influence the actually achievable area coverage, such as the lawn surface properties (obstacles, geometry), grass height and moisture level, the working speed, mulching, etc. The area coverage can be increased by recharging or using multiple batteries

SMART SOLUTIONS

NEW ADVANCE PROCOM

The STIHL ADVANCE ProCOM conference system allows for clear communication with up to 16 other headsets in noisy environments. Bluetooth® connectivity links the headset to a phone, allowing the user to listen to music and answer calls with the touch of a button. ProCOM packs in plenty of other features too, such as radio functionality, app customisation and an optional ambient mode that allows the user to clearly hear their nearby environment, and react to hazards such as traffic or plant machinery. For more information visit blog.stihl.co.uk.

NEW SMART CONNECTOR 2 A

The new Smart Connector 2 A connects directly into the control module of selected professional AP System battery machines. Compatible models currently include all 135 models (HLA, FSA, KMA, HTA), RGA 140, new 2022 versions of HSA 94 R / HSA 94 T and MSA 300. As well as runtime, Smart Connector 2 A also collects information on the operating speed, the status of individual electronic components and ambient temperature. Also features a real time clock, meaning the data is collected accurately regardless of how often the connector syncs with a smartphone[Ⓞ], so you can see when and for how long the tool was used. Pressing the button on the Smart Connector 2 A gives a quick indication of the status of the machine via an LED light, and highlights if a maintenance task is due. The LED can also be used in conjunction with the STIHL connected App to identify individual machines (by lighting up a LED on the connector) in large fleets.

CUSTOM CLOTHING

Stand upright, with a relaxed posture. Ask a second person to measure you.

For **standard clothing** the chest circumference, waist circumference, seat circumference and inseam are needed.

For **custom sizes**, we require all listed measurements. Prices and terms of delivery for custom sizes are available from your local authorised STIHL dealer.

Your jeans size - **waist** and length - is also a good way to estimate your correct size.

1 Height

from top of head to sole of foot

2 Chest circumference

measured horizontally around the body at the widest point of the chest

3 Waist circumference

measured without pulling the tape tight

A For overalls and jackets: stomach circumference (at navel)

B For trousers: waistband circumference (at trouser waist)

4 Seat circumference

at the widest point of the seat

5 Inseam

measured from the crotch to the ground

6 Thigh circumference

at the widest point of the thigh

7 Arm length

from the shoulder edge to the knuckle via the elbow, measured with the arm bent

Jacket length

from the collar seam to the hem (measured from a well-fitting jacket)
